At the beginning of a project, during Iteration 0 (see Figure 1), you want to do some initial architecture modeling to identify a potential vision for how your team will build the data warehouse. As Agile Model Driven Development (AMDD) suggests, you do not need to create a comprehensive, detailed model up front, you only need a high-level vision at the beginning of the project and the details can be identified on a just-in-time (JIT) basis via model storming. Sometimes a simple whiteboard ...
