Agile Estimating Planning Your Sprint

Definition. Sprint planning is an event in the Scrum framework where the team determines the product backlog items they will work on during that sprint and discusses their initial plan for completing those product backlog items. Teams may find it helpful to establish a sprint goal and use that as the basis by which they determine which product backlog items they work on during that sprint.

Listen to Agile Estimating & Planning Your Sprint with ...

The are two reasons to estimate the sprint backlog. First is that it helps the team determine how much work to bring into the sprint. By splitting product backlog items into small, discrete tasks and then roughly estimating them during sprint planning, the team is better able to assess the workload.

Agile Teams Estimate Product Backlogs & Sprint Backlogs ...

Agile Estimating and Planning. Thanks to my experience with Agile estimating and planning and after reading several articles about it, I concluded that there are two methods and both have some (dis)advantages: Capacity Estimating method: The total number of hours available for the team for the new Sprint is calculated. Next, the prioritised User Story is taken and broken down into tasks after which the team will be estimating each Task.

Agile Estimating and Planning: Which method should you choose?

TFB / NFC / 1 (Sprint) This Agile estimation technique is similar to Big/Uncertain/Small but puts a specific "size" into the mix, namely 1 Sprint. The categories are "Too F-ing Big", "No F-ing Clue"

and “1” Sprint (or less). I learned this one recently from someone in one of my CSPO classes.

9 Agile Estimation Techniques - Berteig Consulting and ...

When using agile development, teams generally deliver a working piece of software at the end of each sprint as a release (or version). However, when you're long-term planning and roadmapping, you need to define some rough release points on your roadmap, so you can estimate release dates over the next quarter.

Long-term agile planning - 8 steps to get started

Workfront's collaboration tools makes it easy for teams to collaborate in task boards to quickly estimate Story Points, move items into Sprints, and reassess data in Sprint Retrospectives. Take some time to get your team up to speed on Story Points, so you can invite their input as you plan and kick off your projects.

Estimating Story Points in Agile | Workfront

Lead a Structured and Disciplined Agile Transformation Download Now During sprint planning, we break the stories down into tasks, estimate those tasks, and compare the task estimates against our capacity. It's that, not points, that keep us from overcommitting in this sprint. No need to change the estimate.

Don't Estimate Stories In Sprint Planning - LeadingAgile

In agile development, the product owner is tasked with prioritizing the backlog—the ordered list of work that contains short descriptions of all desired features and fixes for a product. Product owners capture requirements from the business, but they don't always understand the details of implementation. So good estimation can give the product owner new insight into the level of effort for ...

What are story points and how do you estimate them?
