Thick coaxial cable is also referred to as thicknet. 10Base5 refers to the specifications for thick coaxial cable carrying Ethernet signals. The 5 refers to the maximum segment length being 500 meters. Thick coaxial cable has an extra protective plastic cover that helps keep moisture away from the center conductor.

### Chapter 4: Cabling

"See Figure 1." 5. Insert the wires into the connector making sure the wires stay in the intended order. 6. Use the crimp tool to secure the wires in the connector. Once crimped, visually inspect connector and use pull test to check crimp. 7. Repeat steps 2-6 on the opposite end of the cable. 8. Insert ends into the cable tester to check cable.

### Lab Report 2 - Network Cables | Networking 1

Category 1/2/3/4/5/6/7 - a specification for the type of copper wire (most telephone and network wire is copper) and jacks. The number (1, 3, 5, etc) refers to the revision of the specification and in practical terms refers to the number of twists inside the wire (or the quality of connection in a jack). CAT1 is typically used for telephone wire.

A server room is a room, usually air-conditioned, devoted to the continuous operation of computer servers. An entire building or station devoted to this purpose is a data center. The computers in server rooms are usually headless systems that can be operated remotely via KVM switch or remote administration software, such as Secure Shell (ssh), VNC, and remote desktop.
